Fleet

Savings: fuel consumption

In 2012, Cyfrowy Polsat Group further strengthened its position by acquiring the undertaking Polkomtel company

The companies car fleet consolidation starts

- Renting up to 24 months
- Operating Lease
- CFM full service
- GPS Monitoring

- Fleet Management Policy
- Advance data analysis
- FMS system implementation

- Short term rental
- Internal rental service dedicated to Polkomtel and Cyfrowy Polsat companies

- Car sharing – rental service dedicated to whole Capital Group
- Rental service for individual customers – private purposes usage

The new approach of fleet data analysis

Do you know power of data managed by you?

The basic data collected from *Central Computer* and *GPS* allows for carrying out **80% of baseline analysis**: avg. fuel consumption report, avg. vehicle mileage, avg. speed.

New approach to the fleet data analysis

Future....

The fast rise of data volume forces companies to change the approach to data analysis. The new technology trend, open source solutions and growing spread of embedded in-vehicle connectivity technology require investment in new solutions and searching for new directions of development.

KNOW YOUR DATA = KNOW YOUR CUSTOMER

According to the forecasts, the amount of data 'produced' by cars will continue to grow, mainly due to the development of the autonomous car industry.

Data generate per second	GPS 50 KB	LIDAR ~10-100 KB
SONAR ~10-100 KB	RADAR ~10-100 KB	CAMERAS ~10-100 KB

The background is a green-tinted image of a car's front end, specifically the hood and headlight area. Overlaid on the left side is a speedometer with numbers 0, 20, 40, 60, 80, and 100. The needle is pointing towards the 40 mark. The text "Thank you!" is centered in the middle of the image in a large, white, sans-serif font.

Thank you!
